

Event Report

Makers Mystery

Date: 25th November 2024

Time: 3:00 PM – 4:30 PM

Venue: LBCH

The Mechanical Engineering Association (CIT) successfully organized the **Makers Mystery** event for first-year students on the 25th of November 2024. The event aimed to engage students in fun, hands-on engineering challenges that promoted teamwork, creativity, and technical skills.

Event Details:

- **Participants:** Approximately 80 first-year students participated in the event.
- **Activities:**
 - The event featured three exciting games:
 1. **Paper Tower Making**
 2. **Catapult Making**
 3. **Technical Connections**
 - Teams competed in each game, showcasing their ingenuity and problem-solving abilities.
- **Objective:**
 - Encourage collaboration and foster a deeper understanding of engineering concepts through interactive activities.

Outcomes:

- The event saw enthusiastic participation from students, who displayed creativity and teamwork throughout the games.
- Each game tested different engineering skills, helping students gain practical experience while having fun.
- The overall atmosphere was engaging, with students enjoying the challenges and collaborating effectively as teams.

The **Makers Mystery** event was a great success, leaving students motivated and excited for future technical events.
